

Commissioners-

I live in the largest radio market in the counrty, and due to consolidation of ownership, the radio programming is horrible. Therefore I subscribe to satellite radio.

I have it both at home and in my car.

Please oppose the NAB's petition 04-160 that would prevent satellite radio from delivery of weater and traffice information. I can tell you I use it, and I want to continue to receive it.

Respectfully

Chip James
